Customer Reviews

"I enjoyed this tutorial. It seemed to be very up-to-date. The instructors were clear, concise, and thorough. The structure was intuitive and presented in an understandable manner, building on each step and using data frames and sets that avoided confusion by using names that didn't sound like operational commands and vice versa. Grammar and logic were exceptional, with very little wasted time.

Kovid

"I love this cPanel Certification course. It is very valuable and easily understandable.

Vilakshan Narang

"This is a really great course with very detailed videos and notes to provide a solid understanding of the material presented. Very nicely done and easy to understand and follow along for someone that is not as experienced.
