Course Overview

In this Course you get to learn:

You will get to learn a thorough working knowledge of the concepts of Elasticsearch, how it is used to support real-time indexing, full-text search.

We also understand the best practices, key features, distributed search application development with Elasticsearch.

Elasticsearch Certification Skills

You get to learn about the below skills:

This Elasticsearch Training will be transforming you from a beginner to an expert who will be capable of customizing things to meet their own requirement.

The course will take you through all the Jargon related to a search engine and will explain each and every single terminology with details.

About Elasticsearch

Elasticsearch is a search engine that indexes the HTTP links so that appropriate result could be offered after processing the search query. It is an efficient search engine that is capable to index the documents as well in addition to the HTTP links.

Elasticsearch has to index the links and documents, has to set the precedence and also has to provide autosuggestion and for all those things, it uses Lucene StandardAnalyzer. It is built on the top of Apache and has been developed in Java.

Elasticsearch Certification Course

This is a Bundle Course that includes complete in-depth Become Elasticsearch Certification Course combined into one Complete Course.

This Bundle perfectly meets the requisite of the industry and gives you a better chance of being hired as Elasticsearch Certification professional.

1

Beginners to Beyond

Section 1 . Introduction

- Introduction to Comprehensive Elastic Stack (Elk Stack) Training
- Introduction to Nosql

Section 2 . Glossary

- Installation of Elastic Search
- Important Key Definitions
- Cluster of Elastic Search

Section 3 . Mappings

- Mappings
- Types of Datable Elastic Search
- IP Keyword Date and Nested

Section 4 . Analyzers and Analysis

- Elasticsearch Analyzers
- Analyzers Consists of 3 Components
- Tokenized Inverted Index
- Token Filter
- Transactions
- Edge Gram and Synonym Analyzer

Section 5 . Configurations

- Cluster Dot Name
- Discovery Configuration
- Geteway Configuration
- Field Data

Section 6 . Split Brain

- Split Brain
- How to Avoid the Split-Brain Problem

Section 7 . Full text Queries

- Query Context
- Filter Context
- Match Phrase Query
- Text and Title Query

Section 8 . Term and Terms query

- Term Level Query
- More on Term Level Query

1

Beginners to Beyond

Section 9 .Range Query,Prefix and Exists Query

- Range Query
- Prefix Exists Query

Section 10 . Geo Shapes and Query

- Geo Shape Data Shape
- Geo Shape Data Shape Example
- Geo Point Sort Query and its Example
- Geo Distance Query Filter and its Example
- Geo Polygon Query

Section 11 . Problem Solving Workshop

- Working on Behaviour of Keywords
- Convert SQL Query to Elasticsearch Queries
- Working with Data Model
- More on Data Model
- Example of Data Model
- Working with Multiple Custom Analyzers
- Solution Multiple Custom Analyzers
- More on Multiple Custom Analyzers

Section 12 . Dynamic Templates

- Dynamic Templates in Elastic Search Queries
- Example of Dynamic Templates
- Path and Pattern Dynamic Templates
- Example of Path and Pattern
- Working with Attributes Mapping in Dynamic Template
- Creating Mapped Attribute Area Object

1

Beginners to Beyond

Section 13 . Cluster Apis

- Cluster Apis in Elasticsearch Queries
- Example of Cluster APIs
- Cluster Reroutes
- Example of Cluster Reroutes

Section 11 .Indices APIs

- Example of Creating a Slot Index
- Open and Index APIs
- Get and Put Mapped in Index APIs
- Working Indices Aliases using Index APIs

Section 12 . Document API

- Document APIs in Elasticsearch Queries
- Working with Get APIs in Document API
- Working with Delete APIs in Document APIs
- Working with Update and Bulk APIs in Document APIs

2

Elasticsearch Elastic Relations

Section 1 . Introduction

- Introduction to Joining Queries
- Application Side Joins

Section 2 .Nested Queries and Workshop

- Nested Querie
- Checking Mapping Documents
- Nested Queries Workshop
- Index with Proper Mapping
- Indexing Document
- Sign Up and Payment Event
- Post Event Index
- Inner Hits

Section 3 .Child Mapping and Child Queries

- Parent Child Mapping
- Parent Child Mapping Continues
- Parent Field
- Global Ordinals
- Has Child Query
- More on has Child Query
- Sort Parent Documents

Section 4 . Parent Query

- Has Parent Query

Frequently Asked Questions

How long it make take to learn this Elasticsearch Training?

It may take around you a month to three months depending upon your familiarity with NoSQL and working of a web crawler. The one and important thing are how much you are curious to learn it. But based on either you are professional or a beginner, your learning period may vary. Be assured, regardless of everything, you will learn things within three months maximum if you want to learn it.

Why should one learn this Elasticsearch training certification?

One who wants to use a search engine to deliver the solution for a complex problem would prefer to learn this Elasticsearch Training Certification. There will be a lot of learning that will give your career some extra edge. You will be able to work with the search very efficiently and will open a lot of opportunity doors for yourself.

Customer Reviews

“

The instructor is really good, the way he explained the concepts was awesome. I liked the content and also the website is easy to navigate. I don't think anyone can find a better course than this.

Greg J.

It is a good course for freshers who want to know about how elasticsearch works and creation of website using that. Videos were fun to learn.

”
