Frequently Asked Questions

Why should I learn the foundation framework?

One can design a responsive website using CSS also, so this question totally makes sense that why one should learn this. Well, designing a responsive website takes a lot of effort and also eats a lot of your productive time. By learning this framework, you will be able to leverage inbuilt classes to make your website responsive, saving lot of your time. You can then utilize that time to improve your creativity.

How long it may take to learn this framework?

Anyone with a good understanding of HTML, CSS, and JavaScript will take pretty less time to learn this while the folks who are beginners and willing to learn this may require to learn the fundamental of the above-mentioned technologies before starting to learn this Foundation Framework Tutorial.

Customer Reviews

"

I liked the way the course is organized. It was simple and easy to understand. Well planned and organized course content. The course is informative and the duration is just right. Suitable for beginners and those who wish to build their own responsive website but don't know where to begin. Looking forward to doing more courses on this platform.

Anto Kollar

"

I liked this course, it gives me a general idea of Foundation Framework and all its component explaining one by one, what are the new contents and where to find excellent resources to let me solve problems, check my projects and keep learning more about Foundation.

George Quintini

"

The course is very detailed and simple. I really appreciate these videos tutorials, they were very helpful and educative. My sincere appreciation for your wonderful support team.
