- Understand Application Structure

Section 2. Installation

- Yii Framework Installation

Section 3. Creating a Basic Page

- Creating a Basic Page
- Creating a Basic Page Continues

Section 4.Cookies and Sessions

- Cookies and Sessions

Section 5. File Upload and Flash Data

- About File Upload
- Flash Data Concept
- File Upload Continued

Section 6 . Html Forms and Database Access

- Creating HTML Forms
- More on HTML Forms
- Database Access

Section 7. Gii-Extension

- Gii-Extension

4 Laravel PHP Framework Training

Section 1. Introduction

- Introduction and Installation

Section 2. Getting Started

- Routing
- Configuration of Laravel
- Middleware Laravel

Section 3 . Example

- Middleware Example
- Terminable Middleware

Section 4. Controllers

- Controllers

Section 5. Request Feature and Example

- Request Feature
- Retrieving Inputs with Request Laravel
- Retrieving Inputs with
- Response
- Cookies
- Views
- Redirection

5 Advanced Laravel PHP Framework Training

Section 1. Introduction

- Laravel Localization
- Sessions Laravel

Section 2. Forms

- Creating Forms

Section 3. Validations

- Validation

Section 4. Laravel and AJAX

- Laravel and AJAX
- More on Ajax

Section 5. Laravel and E-mail

- Laravel and E-mail

Section 6. Laravel and E-mail

- Laravel and E-mail

Section 7. Error Handling

- Error Handling

Section 8. Database Chapter

- Database Connectivity
- Retrieving from Database
- Database Insertion

Frequently Asked Questions

Why should I choose this
PHP certification?

Any PHP Developer or Web end development professional using PHP programming language and who are willing to learn and master PHP and its related frameworks should choose this course. Also, to achieve and attain greater heights in their web development or PHP developer career as should definitely opt for this PHP course. This would also enhance their skill set for excellent opportunities.

I don't have a background in computers or web technologies or technical engineering, can this PHP Course still be considered a good option?

NO, this cannot be easily learned without any knowledge in web technologies or PHP programming language or without any object-oriented programming language. Also, without any computer science educational background, this PHP course cannot be easily mastered. It needs some basic PHP knowledge and also in web technologies in order to quickly and easily understand this PHP course.

Customer Reviews

"

PHP and MySQL Training. This course for me was useful because I would like to learn to develop dynamic and static websites. There I fond knowledge about Web development, design, architecture, publishing website, database with ODBC. Now I can start to develop websites using PHP and Mys SQL. Thank you!

Lina Kankevičienė

I came to know about the course from facebook. I enrolled for this, and I liked the course content. It provided me a healthy sum of information about cakePHP. Which may be scattered all over the internet. It was good experience taking this cakePHP course.
