VBScript Training Course

Course Overview

In this Course you get to learn:

VBScripting language is an active scripting language which was developed by Microsoft and modeled on Visual Basic. It allows the Microsoft Windows-based system administrators to build and generate powerful and efficient tools which specifically used for managing computers along with subroutines, error handling and other programming constructs.

VBScript Course Skills

You get to learn about the following skills

How to write a scripting language and how to execute it.

Writing scripting languages seems to be an easy task but you really need to have hands-on experience in order to be able to write any such kind of a language as the use of improper tags can make your script unexecutable.

Automation testing tools and knowledge about QAs and other testing related domain knowledge

Course Features

Course Duration- 16+ Hours

3 Number of Courses

Verifiable Certificates

Lifetime Access

About VBScript Training Course

VBScript is a client-side script like language such as Javascript. VB Script stands for a visual basic script which is, in fact, a lighter version of Microsoft visual basic. The syntax of VBScript is similar to that of the Visual Basic language.

All in all, if you wish for your web pages to be more lively and active as well as interactive, then you can easily incorporate the use of VBScripting language in your code piece.

VBScript Training Course

This is a Bundle Course that includes complete in-depth Become VBScript Training Course combined into one Complete Course.

This Bundle perfectly meets the requisite of the industry and gives you a better chance of being hired as Become VBScript Training Course professional.

1 Microsoft Visual Basic Script Beginners

Section 1 . Introduction

- Introduction to VB Script
- Features of VB Script

Section 2. Syntax

- Disadvantages of VB Script
- Ignore White Spaces and Line Breaks
- Case Sensitivity and Comments

Section 3. VbScript In Browsers

- Vb Script in Browsers
- Vb Script in Head Section

Section 4 . Variables

- Variables
- Declaring Variable
- Sub Type Description

Section 5 . Constants

- Constants
- Operators
- The Arithmetic Operators
- The Comparison Operators
- The Logical Operator
- Concatenation Operators

Section 6 . Decision Making

- Decision Making
- If Else IF Else Statement
- Basic Syntax of Else IF
- Nested If Statement

Section 7 . Loop

- For Loop
- Flow Diagram
- For Each Loop
- More on Each Loop
- While Wend Loop
- Do While Statement

1 Microsoft Visual Basic Script Beginners

Section 8. Statements and Events

- Exit Statements
- What is an Event
- On Click Event Type
- On Mouse Over Event and On Mouse Out

Section 9. Numbers and Strings

- Vbscript Numbers
- Mathematical Functions
- Strings
- Functions Name and Description

Section 10 . Variables

- InStr Function
- InStrRev Function
- Left and Right Function
- Trim and Space Functio
- StrComp Function

Section 11. Array

- Arrays
- Multi Dimension Arrays
- Arrays Dim Redim
- Arrays Dim Redim Continues
- Arrays Split
- Array Method
- Arrays Filter

Section 12 . Date and Time Functions

- Date Function
- Date Function Continues
- date Serial and Format Date Time
- Is Date day month and year
- Time Function

2 Microsoft Visual Basic Script Advanced

Section 1 . Introduction

- Introduction Advanced VBScript Language

Section 2 . Procedures

- Procedures

Section 3 . Msg Box and Input Box

- Dialog Boxes
- Msg Box
- Input Box

Section 4. Objects

- Object Oriented VBScript
- Dictionary Objects
- Excel Objects
- Write Value
- Creating Simple Operati
- Copying and Moving File
- FSO Write File

3 Microsoft Visual Basic Script Advanced

Section 1. VBScript Basics

- VBScript Basics

Section 2. VBScript Programming

- VBScript programming

Section 3. Object Model

- Object Model

- Dictionary Object

3 Microsoft Visual Basic Script Advanced

Section 3. Object Model

- Object Model

- Dictionary Object

Section 4. FSO and ADODB

- FSO P

3 Microsoft Visual Basic Script Advanced

Section 1. VBScript Basics

- VBScript Basics

Section 2. VBScript Programming

- VBScript programming 4

Section 10. Object Model

- General Functions
- Conditional functions

2 Microsoft Visual Basic Script Advanced

Section 1. Introduction

- Introduction Advanced VBScript Language

Section 2 . Procedures

- Procedures

Section 3 . Msg Box and Input Box

- Dialog Boxes
- Msg Box
- Input Box

Section 4. Objects

- Object Oriented VBScript
- Dictionary Objects
- Excel Objects
- Write Value
- Creating Simple Operati
- Copying and Moving File
- FSO Write File

Frequently Asked Questions

I belong to an electronics I am very passionate about computer science technologies and wish to start my career someday in the field of programming. Should I take this course?

I belong to an electronics and communication background. I have learning in VLSI and embedded programming but I am new to website development and web app or VBScript language. I am very passionate about computer science technologies and wish to start my career someday in the field of programming. Should I take this course?

I do not have any interest in programming languages such as Java. I find them hard to understand but I know the basics of this. Should I be taking this course?

We, at eduCBA craft the VBScript course in such a way that the person who has been taking the course will understand everything from the very scratch and therefore should not have any problem understanding the basics. As already mentioned in the post also, this is just a scripting language like those of JavaScript and other front end web frameworks and doesn't require the enhanced skillset of any programming language per se.

Customer Reviews

> "Very Comprehensive Online Course. I am inviting my friends to try also this online course at a very affordable price... it is a complete training package... It is a self-paced training... train at your most convenient time and location all you need to do are to purchase the course package and after that, you can start the VBScript certification.

Leo S. Tembrevilla

The VBScript certification is excellent for beginners, it covers everything you need to be able to build complex programs. The accent is understandable, sometimes the voice goes a bit too high. In this course you can learn even about multithreading winch I found really useful so that your program can use all the resources of a modern computer."
