# Frequently Asked Questions

---

Why should I choose this XHTML training?

Any UI Engineer or UI Developer or Full-Stack Engineer working on the web page styling or CSS Positioning or Layout designing and who are willing to learn and master the XHTML concepts and advanced PHP knowledge and concepts should obviously choose this Virtualization course.

Is this a quick-fix to clear interview or do I still need to practice continuously while learning this XHTML training Course?

Yes, this is can be a quick-fix with previous knowledge or experience in computers or XML or its relative concepts but HTML knowledge is required. This XHTML training course needs to spend a minimum of 20 plus hours to complete.

# Customer Reviews

“

I am just starting to learn about SQL. This NoSQL course is my first and there was a lot to learn. I am glad that the instructor was clear and concise in the videos and she was very informative. I liked how she made the material easier to understand. I was worried that being a beginner would make it difficult to follow all the material, but the instructor made it easy for a beginner like me.

Linked

Grant Eric

”

This XHTML training is highly recommended for any back-end engineer which has hands-on learning videos that would enhance and enable the learner's experience and confidence. This also contained excellent XHTML concepts which are least understood on the web tutorials.
